
Autopol Bend Simulator Download 5 ((INSTALL))

[Download](#)

Autopol is a full-featured 3D drafting software package that allows direct CAD (Computer Aided Design) modeling of objects with complex 3D curves, which can be edited and shared with others. The entire model can be edited and modified in real time just by moving the mouse. Autopol can be used to design mobile devices, solar panels, wind turbines, furniture, automotive parts, personal electronics or even automotive designs. Autopol is extremely versatile and can simulate almost any style of 3D curve. It can be used as an "off-line" or "online" CAD drafting software package. Autopol has many powerful functions that other CAD programs don't have. Features include: Fe part - Freeware download of Autopol for Windows.
