Since 1992, patients with cystic fibrosis (CF) have been recommended for pneumococcal vaccination, but no evidence is available to show that they benefit from this. We conducted a double-blind, randomized, placebo-controlled, multicenter trial in patients with CF to examine the effect of pneumococcal polysaccharide vaccine (PV) on CF exacerbations. Ten outpatient CF centers in the United States enrolled a total of 108 patients with CF. Participants were randomly assigned to receive either PV with or without diphtheria and tetanus toxoids and acellular pertussis vaccine (DTaP) or placebo. The primary end point was the time to first CF exacerbation. The median time to first CF exacerbation was significantly longer in participants in the vaccine group than in those in the placebo group (4 vs. 4 months, respectively,  $P = 0.013$  by log-rank test). The risk of developing an exacerbation was not significantly different between the groups, and the risk of developing a severe exacerbation was significantly higher in the placebo group than in the vaccine group ( $P = 0.007$  by Cox proportional hazards analysis). Pneumococcal polysaccharide vaccine reduces the incidence of CF exacerbations in patients with CF, but does not reduce the risk of developing a severe exacerbation.The Burning Soul The Burning Soul is the debut studio album by English electronic music artist Unkle, released on 2 March 2011 on their own label Unkle Records. It was his debut recording as a full-time producer and his follow-up to the single "Leather Jacket & Glasses". Singles
